

Hybrid Networks

- Site to Site VPN

- Multi site to multi site vpn (WAN/hub-spoke)

Operations

- Access:
 - User Access Management
 - Network Access Management
 - Permissions Management
- Backup and Disaster Recoveries
 - Basic Backup plans according to industry best practices.
 - Disaster Recovery
 - Automatic Recovery (Auto failover)
 - Manual Recovery (Manual Failover)
- Automation:
 - Identifying all the manual activities and enabling automation
 - CLI
 - Scripting
 - Templating
 - Python
 - Toolings:
 - Common administrative activities
- Troubleshooting
 - Monitoring
 - Logs

- Audits
- Setups:
 - Hybrid Network Setup
 - User import or integrations
 - Policy

What we will be learning as Operations and Migrations

- Monitoring & Logging
 - Cloudwatch (AWS)
 - Monitoring (Azure)
- Policy Setups
- BCDR
- Automation around cli and tooling
- Migration (2 weekends)
