

# Storage Needs for an Enterprise

## Application wise Usecases on storage

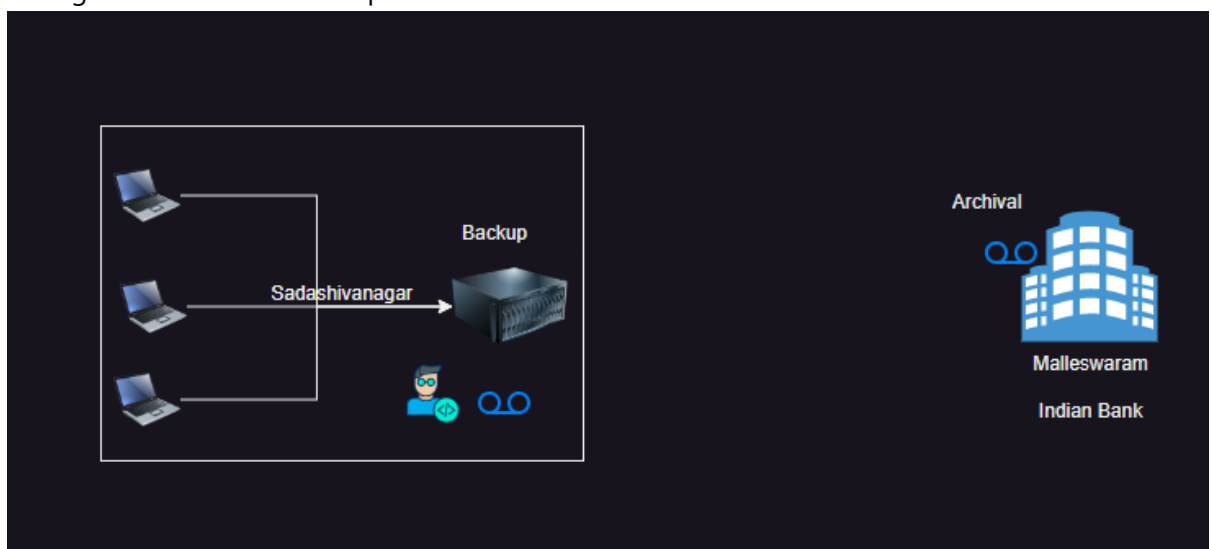

- WebApps
  - To store media (images, docs, videos)
- Backups and Archives:
  - To store backups
- Applications:
  - Disks
- IT:
  - Shared disk

## Cloud usage

- think of infra as software (we use some one else's hardware and we pay according to usage)

## Backup and Archives

- Backup:
  - Used for quickly recovering from failures
  - It should be quick
  - prices should be moderate
- Archive:
  - Used for recovering from disasters
  - It might take time in hours or days to recover
  - Storage costs should be cheaper

## Media Storage

- Media used by Websites:
  - These are accessed from web
  - This is evergrowing
- Generally companies use Content Delivery Networks.

## Blob Storage

- A storage of any file type and is accessible over https (url).
