# Azure Account Organization

- Overview

- How to organizations maintain Accounts?

  - Management groups Refer Here Preview

- Tagging for Resources (Best Practice)

  - Tags help in filtering the resources
  - Tags can also filter billing.

- User Creations:

  - test users with limited permissions

- In Azure at resource, resource group and subscription level blades, we will find

  - Activity log
 - Access Control (IAM)
  - Tags

Activity Log

- This is an audit log available at resource, group, subscription level describing all the audit events

Monitoring and Alerting

- Azure offers monitoring for every resource in the monitoring blade
